Summary

Am Backend Developer specializing in ASP.NET Core and C#. Highly proficient in implementing robust architectures using advanced Design Patterns and Clean Architecture to ensure code scalability and maintainability. Skilled in building high-performance RESTful APIs, database optimization, and methodical problem-TECHNICAL SKILLS

COURSES & INTERNSHIPS

- | | |
|--|------|
| • Digital Egypt Pioneers Initiative (DEPI) Full-Stack Development Track | 2026 |
| • Route Academy Full-Stack .NET Diploma | 2025 |
| • Microsoft Security, Compliance, and Identity Fundamentals | 2024 |
| • CISCO CCNAv7: Switching, Routing, and Wireless Essentials | 2024 |
| • CISCO CCNAv7: Introduction to Networks | 2023 |

TECHNICAL EXPERIENCE & PROJECTS

Hospital Management System | ASP.NET Core MVC

- Developed a comprehensive system to manage consultants, departments, and medical records.
- Implemented **Repository Pattern** and **Unit of Work** to decouple data access logic from business logic.
- Used **AutoMapper** and **ViewModels** to ensure secure and efficient data transfer between layers.
- Designed a dynamic search and filtering engine for doctors and medicines.

E-Commerce (Store System) | ASP.NET Core Web API

- **Architected a scalable Web API** using **Onion Architecture**, ensuring strict separation of concerns and maintainability.

- **Integrated Stripe API & Webhooks** for a full payment lifecycle and automated order status management.
- **Implemented Secure Authentication** via **Identity & JWT Tokens** with Role-Based Access Control (RBAC)..
- Optimized Performance using Redis, reducing data retrieval time by **40%** and decreasing database load during peak hours.
- **Engineered a Dynamic Filtering System** using the **Specification Pattern** for efficient data querying.
- **Developed Centralized Exception Handling Middleware** for consistent, production-ready error management.
- **Applied SOLID Principles & Design Patterns** (Repository, Unit of Work) for a decoupled, testable codebase.

Recruitment Management System | Django (Graduation Project)

- Engineered a recruitment platform to streamline the hiring process and applicant tracking.
- Implemented user authentication and role-based access control (RBAC).

Medical & Dental Management Suite | Freelance Projects

- **Delivered tailored management systems** for multiple healthcare providers, including **ishraqah-medical-center** and a **Private Dental Clinic**.
- **Engineered a modular Administrative Panel** to automate patient records, appointment scheduling, and doctor shifts, adaptable to different medical specialties.
- Streamlined clinic operations, improving staff productivity by **25%** through automated scheduling.navigation, enhancing staff productivity during peak hours.
- **Tech Stack:** ASP.NET Core MVC, SQL Server, Entity Framework Core, Bootstrap.

-
- **Languages :** C#, JAVA, SQL , HTML5, CSS3, JavaScript. Python.
 - **Back-End :** ASP.NET Core MVC, Web API, Entity Framework Core, LINQ, Django.
 - **Front-End :** Angular (v14+), Bootstrap, Responsive Design.
 - **Tools & Version Control :** Git, GitHub, MS SQL Server, Postman.
 - **Soft Skills :** Analytical Problem-Solving, Clean Code Mindset, Team Collaboration, Technical Documentation, Adaptability.
-

EDUCATION

Bachelor's Degree in Computer and Information Technology at EELU University | 2025
